FIREWIRE SOLUTION FROM

MICROSTORAGE

Firewire 1394 3,5" harddisk drives for PC and MAC

Here's a fast, easy way to add additional storage to a Macintosh® or PC. These external FireWire hard drives plug into any OHCI compliant FireWire-enabled computer and within seconds are up and running. The FireWire interface (also known as IEEE 1394 and i.LINK) has 30 times more bandwidth than USB, making it the perfect technology for high-speed devices like the latest hard drives, digital video (DV) camcorders, CD-RW drives, printers, and scanners.

- The fast, easy way to add a hard drive to your PC or Macintosh.
- Effortless connection, truly plug-and-play.
- FireWire provides 30 times more bandwidth than USB.
- Hot swap capability allows easy connection of a new peripheral without turning off the computer.
- The combination of a second generation (ATA66) 1394 to IDE bridge, along with the 7200 RPM ATA66/100-capable, high capacity drive equates to performance near the limits of the FireWire interface.
- Compact design.
- Cables are simple and easy to connect and can be up to 15 feet long.
- 1-year warranty.

- Make room for the massive amount of data utilized by today's digital technologies, such as digital camcorders, cameras, and digital music collections.
- Give yourself plenty of space for digital video or music editing.
- Easy data backup solution.
- Add virtually unlimited storage with multiple FireWire external hard drives.
- Lock up your drive for extra data security.
- Share files between computers.

Features:

- Fully interoperable with implementation of IEEE-1394(1995) and IEEE 1394A-2000 compliant
- Data Transfer rates of 100/200/400 Mbps
- Supports IDE PIO modes and DMA modes and Ultra DMA modes up to UDMA 100
- Autmatic SBP-2 protocol managment by an internal hardware engine to improve performance and firmware efficiency
- Dedicated asynchronous data transfer
- Automatic single-retry protocol and split transaction control
- Supports 4K bytes of FIFO for bi-direction transmit/recive data
- OS supported Win 98SE/ME/2000/XP/Mac OS 8.6 or higher

System Requirements:

- IBM compatible Pentium-233MHz or faster & MAC PC
- 64MB RAM or more
- Available IEEE 1394 port
- Systems with OS: Win98SE/ME/2000/XP and Mac OS 8.6 or higher

Package Contents:

- The IEEE 1394 to 3,5"IDE External Case
- One 3,5" EIDE harddrive ATA100
- Power adapter
- IEEE 1394 cable
- Power Code
- User manual

Partnumbers:

MS40E/FW 40GB
MS80E/FW 80GB
MS120E/FW 120GB
MS200E/FW 200GB
MS250E/FW 250GB
